Francisco Mateus

Application Specialist | AI and Master Data (Stibo STEP Certified | JavaScript)

Łódź, Poland ✉ mat.francisco@proton.me in linkedin.com/in/franc1scomat
github.com/intend-dev ⊕ intend-dev.github.io

SUMMARY

Application Specialist at Bosch, working on Stibo STEP product data. Looking for AI engineering roles where clean data and auditable systems matter.

EXPERIENCE

Application Specialist (Stibo STEP Certified | JavaScript) Aug 2024 to present

Bosch (Bosch Digital), Warsaw, Poland

- Stibo STEP developer and platform specialist across two Bosch divisions, Power Tools then Mobile Aftermarket.
- Lifted product-number accuracy across a region, sub-region, and country hierarchy by designing sales-channel and commodity-code exclusion logic, cutting misrouted assortment entries for the Mobile Aftermarket division.
- Improved reviewer control over product data by designing Business Rules and Business Actions for object lifecycle, reference management, and attribute-approval workflows, including partial-approval logic for references and values.
- Reduced duplicated, fragile wizard behaviour by refactoring monolithic WebUI Business Rules into reusable library functions, giving multi-step product-creation screens one consistent, screen-specific validation source.

Software Engineer - ServiceNow ITSM Jan 2022 to May 2024

Sii Poland

- Managed and optimised IT Service Management (ITSM) processes in ServiceNow, ensuring efficient incident, problem, and change management across the organisation.
- Effectively implemented and documented software changes, modifications, and optimisations in alignment with the product life cycle analysis, supporting ongoing projects within an Agile-driven environment.

Application Developer - ServiceNow ITSM Jun 2018 to Dec 2021

Fujitsu Poland

- Built new applications with HTML, CSS, and JavaScript against ServiceNow best practices.
- Created software applications in a test-driven development (TDD) environment.
- Worked in Agile delivery to maintain project timelines and resourcing.

IT and Web Support Sep 2014 to Jul 2017

Cooperativa António Sérgio para a Economia Social

- Designed and implemented layouts for usability and performance against UI/UX best practices.
- Created and maintained content in the Joomla platform.

Automation and Robotic Technician Jan 2014 to Aug 2014

Introsys - Global Control Systems Designers

- Preemptive maintenance of industrial robots and electronic components.

Technical Support Oct 2013 to Jan 2014

Portugal Telecom

- Provided technical support to end-users.

SELECTED CASE STUDIES

Additional Case Studies: intend-dev.github.io/work

Enterprise Multi-Agent Code Review Orchestrator

Multi-agent code-review system on the Claude Agent SDK: an orchestrator fetches pull requests through 2 MCP servers (GitHub, ESLint) and spawns 3 specialist subagents per changed file.

- Shipped across 9 run IDs; aggregated findings into validated JSON, Markdown, and HTML reports with PR scores 82, 58, and 42 of 100.
- Backed by 56 unit tests and a $2.00 per-run budget cap enforced in code.

NASA Mission RAG

Retrieval-augmented system over NASA mission documents with enforced citations and a live RAGAS evaluation loop.

- Indexed 16,497 chunks across about 6 MB of transcripts and technical reports (2,470 lines across 5 modules).
- RAGAS over six stored answers, not live system output: faithfulness 0.75 and answer relevancy 0.7447; context precision 0.9999 was a self-comparison.

AI Budget Predicter (Ethics)
Budget-prediction model built to test fairness, showing that accuracy can hide discrimination.

- 156,317 samples; balanced accuracy 0.9885 with Disparate Impact 0.0149 and SPD -0.5831 against secondary-school graduates.
- Reweighing restored equal opportunity (EOD 0.0000); the model card documents the target leak I found (permutation importance 0.1521).

Selected from more than 30 private Udacity and MSc projects. Each study shows the architecture, the failures, and the measured results.

SKILLS

Full certification list on LinkedIn

AI AND ML

Machine Learning, Deep Learning, PyTorch, Natural Language Processing (NLP), Large Language Models (LLM), Retrieval-Augmented Generation (RAG), Ethics in AI, Knowledge Graph Embeddings

AI ENGINEERING

AI Agents, Agentic AI, LangChain, LangGraph, Model Context Protocol (MCP), Prompt Engineering, Claude Agent SDK, LLM Evaluation, Model Evaluation, AI Governance, Responsible AI, AI Fairness, Software Testing, Test Automation

DATA

SQL, Data Modeling, Data Governance, Data Quality Management, Data Validation, Algorithms, Data Structures

MASTER DATA (STIBO)

Stibo Systems, Master Data Management (MDM), Product Information Management (PIM), Business Rules, Workflow Design, Web UI Design, User & Role Management, Access Control, Automation, Business Process Management

DEVELOPMENT AND TOOLS

Python, JavaScript, TypeScript, React.js, HTML5, CSS, Java, Git, Linux, Agile Methodologies, Jira, Amazon Web Services (AWS)

EDUCATION

Woolf
Master of Science, Artificial Intelligence (in progress)

Delivered through the Udacity Institute of AI & Technology; accredited by the Malta Further and Higher Education Authority (MFHEA); EQF Level 7. Coursework: AI programming with Python, neural networks, generative AI, LLMs, RAG, multimodal AI, AI ethics, and agentic AI. More than 30 peer-reviewed projects.

OpenClassrooms
RNCP Level 6, Application Developer

Professional certification in application development. Coursework: requirements analysis, UML and database design, application development, unit and integration testing, technical documentation, and technology watch.

ATEC
CET Level 5 (QNQ), Automation, Robotics and Industrial Maintenance

Technological specialisation. Coursework: CAD, PLC and HMI programming, industrial robots, industrial networks, electrical and pneumatic circuits, and maintenance; includes a 535-hour work placement.

ESCS
BA, Marketing and Advertising (partial coursework)

Coursework toward the bachelor's degree in Advertising and Marketing (Instituto Politécnico de Lisboa). The programme covers marketing fundamentals, consumer behaviour, statistics and market research, digital marketing, graphic design, and creative writing.
